

SEALIFT²
SEALIFT

**Oceans apart from
any other boat lift**

Sealift2's eco-friendly floating dry dock represents a major breakthrough in boat lifting equipment. It is a completely self contained unit capable of lifting 60ft motor boats and yachts weighing up to 50 tons.

FAST: Lifts 50 tons in less than 5 minutes using **Sealift2's** unique patented pneumatic lifting system. Lift, clean and re-launch in less than an hour.

ECO-FRIENDLY: Collects all potentially toxic wash off.

EFFICIENT: Increases cruising speed and reduces fuel consumption.

ECONOMICAL: Regular hull cleaning reduces the frequency of antifoul painting.

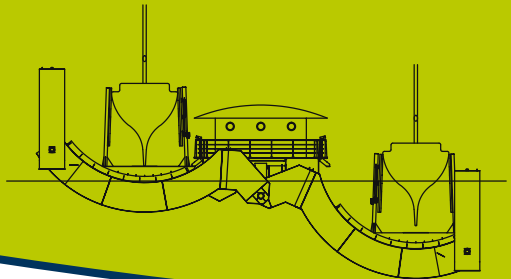

Creative Marine Innovation

Available in single or double dock configurations, **Sealift2**'s rolling deck floating dry dock is the answer to the ongoing loss of valuable waterfront land to housing and marina developments, which consumes local shipyards and servicing areas.

With proven ability to operate in open waters - thanks to its central catamaran pontoon with built in water storage tanks and integrated slurry barge for waste disposal - **Sealift2** creates a self-contained and stable platform, which frees up valuable foreshore.

Technical specifications

Equipment

Water storage:	32 tons
Compressor:	Atlas Copco XAS 186 Dd 395cfm at 7 bar
Jet washers:	2 off Karcher HD 13/12 4ST
Waste pump:	Godwin CD 75/7.5 KW Dry Prime Pump – handles solids up to 30mm
Water lift pump:	Lowara Ceam 70/5 V/A
Bilge pump:	2 off Sahara Series Automatic
Hydraulics:	75 litre tank, 5.5KW motor, 11cc pump, STN C TOP3 Manifold

Technical specifications

Boat lift capacity

Maximum displacement:	50 tons
Maximum waterline:	16.76m (55ft 0in)
Maximum beam:	5.43m (17ft 10in)
Maximum keel:	3.00m (9ft 10in)
Motor boat supports:	4 off aluminium stools SWL 33 tons each

Dimensions (width x length)

Dry dock:	6.04m x 16.76m (19ft 10in x 55ft 0in)
Catamaran dimensions:	7.00m x 15.00m (22ft 11in x 49ft 2in)
Max combined footprint:	17.20m x 21.88m (56ft 5in x 71ft 9in)
