Thanks very much for the lift out and clean off and anti-fouling job yesterday. I was very impressed with the professionalism skill and thoroughness of your operating crew. I was also impressed with the equipment and operation of the platform. the boat was handled like an egg with not the slightest bit of damage which can occur when strops and lifting gear is used. It was also in a comfortable position on the platform where a thorough inspection of the bottom of the boat could be made. It is fantastic to think that the whole operation was done in such a short time. One last thing was that the trip home saw the speed go up on the same revs and the same strength of tide from 9knots to 12 knots.

Many thanks again for a wonderful job, I would recommend your service to anyone.

Kind regards
Tim Parvin
