

PRESS RELEASE: Revolutionary new floating dry dock platform now available in Italy

DATE: 17th November 2008

Sealift2 International Limited, manufacturers of a unique rolling deck, floating dry dock platform is pleased to announce the availability of their Sealift2 platform in Italy, through the appointment of an exclusive local agent.

“We believe the Italian market offers great potential for the Sealift2 platform” said Richard Bayley, Managing Director of Sealift2 International Limited. “Our platform offers marina owners a fast, economical and space saving alternative to a travel lift. What’s more, the Sealift2 dock is eco-friendly, collecting and disposing of all wash-off strictly in accordance with local environmental laws.”

The Sealift2 platform will lift 50 ton boats and yachts in less than 5 minutes. So in under an hour, a boat can be lifted, cleaned, have its anodes replaced and be back in the water. Longer jobs, for example antifouling, can also be scheduled, normally as the last lift of the day with paint drying overnight.

“We have owned and operated our own dock in Cowes, Isle of Wight for a couple of years, so we know this is a great business to be in” Richard concluded.

“This is a great time to be involved with Sealift2” Jon Howes, Sealift’s newly appointed agent in Italy commented “it’s a young company with ambitious plans, and a proven product that all Italian marina owners should take a look at”

For Editors:

Sealift2 International Limited is a privately owned company based in Cowes, Isle of Wight which specialises in designing and building eco-friendly pneumatic dry docks which deliver the fastest lift times available in the industry. The rolling deck design lifts boats up to 18m in length (17m waterline) with a maximum beam of 5.5 metres. It has been certified by Lloyds British Testing Limited to lift boats weighing up to 50 tons. Larger models are available on request.
